Reentry Period:

- 12 hours.

COMPOSITION

Alpha-cypermethryn.....5.52%

TECHNICAL CHARACTERISTICS

Appearance: Transparent liquid.

Colour: Slightly amber.

Odour: Faint.

Density: 0.975 g/cm³.

Not flammable.

Emulsion: Micro-emulsion.

pH: 5-6 (al 2% in water).

STORAGE

Maintain the product always in its original bottle.

Store in a fresh and dry environment away from flames and heat.

PACKAGING

Bottle of 1 liter in boxes of 12 units.

ZENITRÍN

EC

Alpha-cypermethryn 5,5%

Concentrate insecticide micro-emulsifiable in water, designed to be applied by spray against a wide range of pests.
